Princeton, NJ plastic surgeon Adam Hamawy, MD treated this 34-year-old patient's loss of fullness with a NeoGraft hair restoration procedure and PRP therapy.

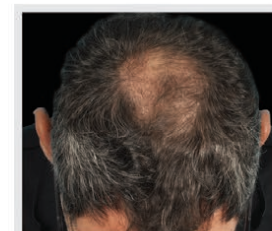

To reverse this 47-year-old patient's frustrating hair loss, Wayne, NJ facial plastic surgeon Jeffrey Wise, MD treated her with three PRP treatments spaced four to six weeks apart and a topical solution for alopecia.

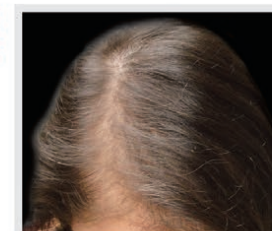

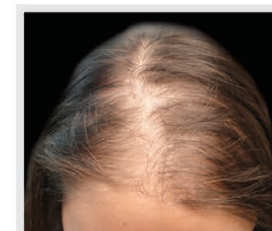

Beverly Hills, CA dermatologist Rhonda Rand, MD treated this 26-year-old patient's thinning hair with a series of PRP injections in the patient's scalp to stimulate growth.

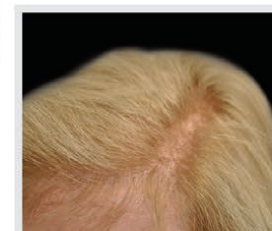

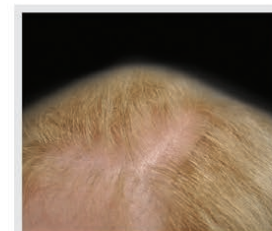

This 70-year-old patient underwent the "The Activator" treatment with Greenwich, CT dermatologist Mitchell Ross, MD, which included two PRP treatments and ACell injections into the scalp.

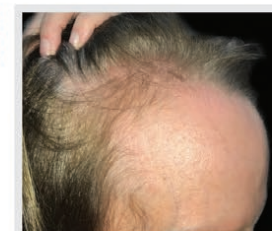

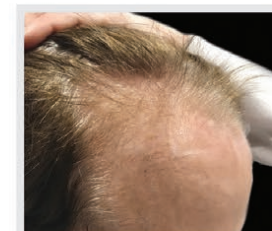

To address this 51-year-old patient's concerns about thinning hair, Grand Rapids, MI plastic surgeon Bradley Bengtson, MD performed a NeoGraft hair restoration procedure. Results are shown six months post-treatment.

Engelwood Cliffs, NJ dermatologist Jeffrey Rapaport, MD performed three PRP treatments over the span of two years to help restore this 19-year-old patient's thinning hair.

This 54-year-old patient experienced thinning hair after menopause. To fill in sparse areas, New York hair restoration specialist Carlos Wesley, MD performed a hair transplant, and results are shown here after one year.

To address longstanding hair loss on this 58-year-old patient's hairline, New York dermatologist Adebola Dele-Michael, MD used EuroThreads to stimulate new growth in three months.

Individual results may vary. Undergoing this treatment does not guarantee these exact results.
