

PRODUCTS TO DISCONTINUE 10-14 DAYS PRIOR TO PROCEDURE

It has been well demonstrated that pain medicines such as aspirin and motrin, in addition to other medicines and herbal supplements, can cause prolonged and excessive bleeding during surgical procedures. Please check any medications you may take to see if they contain aspirin. When in doubt, contact your pharmacist or Dr. Wise. Remember that Tylenol/acetaminophen and multivitamins are acceptable to use. The following is a sample list of some common medications that should be avoided prior to your procedure.
